What Did I Get out of Strive.

One of the important things I got out of Strive, is how to do a resume and how to fillout a application the right way. How to market myself in a interview, Strive showed me how to do a cover letter. I also got out of the 3 weeks that you can put strangers together in a room and by the end of the group, they feel like Family! and some feel they found New Friendship. For me the Hard skills and soft skills was a good one. I new nothing about that, if I would had been asked befor Strive, what is my soft skills. my answer would have been, what the hell are you talking about. \* If I would had been asked what are my hard skills I would have talked about my hard skills from the street. I got some new things, some helpful things that will help me get and keep a job. This is the Best Group I've Ever Done!

Thank You!
