

3 week overall experience

My overall experience was trying at times. But with every day I showed up I got more valuable information out of it. Coming everyday was a task within itself because of my situation. But through determination I sit here proud of myself and my classmates who stuck it out with me. They played a big part in me showing up everyday. I really looked forward to seeing them everyday. We started with 34 and finished with 15. Now it's time to put what we learned to use and land the jobs that we are looking for. As for the staff, the professionalism is where I was sold on finishing this program. So I give thanks to you guys and keep up the good work.
