"What I Learned from Strive" 11/4/10

I learned that no matter how much experience you have in the working field, you will always need to go back and brush up on your skills. Before coming to Strive I always thought my confidence was through the roof. But when I attended Strive I learned that my confidence, fears, and outlook on life needed some improvement. Attending this program helped me with all my needs of improvement. I learned to be more confident. I also learned skills to help me succeed in the working world. You are never too old to learn. Leaving Strive for me is sad, my classmates and the whole staff is awesome. I would like to thank Strive and the staff for the opportunity for my improvement with my skills and for the improvement in myself.
