Strive was a very rewarding experience and I gained alot of valuable knowledge that will help me throughout my life. My favorite part of STRIVE was how it was so diverse we had all different types of cultures and was able to meet people that I don't think I would've ever met. While attending STRIVE I also picked up on valuable skills that will help me when applying for jobs, conducting interviews, STRIVE also helped with my self-esteem and gave me confidence that I never thought I had. STRIVE is an excellent program that teaches employability skills that can really help people. Also the staff is very personable, helpful and most of all sincere. I have nothing but positive feedback and hope the program will be around because it really does help those who society has turned there back on.
