

March 17th"Final Essay"

This has been the best time spent
three weeks of my working life,
in terms of knowledge gained -
very intense and very productive.

I've met some good people
and formed a few bonds that
I hope will extend far into the
future - both professionally and
personally.

It's been a rewarding and
extremely beneficial experience,
overall, and if the objective is
obtained, then the entire strive
concept will once again have proven
to be a success!
