My strive experience was wonderful. A lot I thought I knew I actually didn't know. Strive is like therapy, a workshop, and a job all in one. Besides not getting paid, Strive has motivated, encouraged, and inspired me to think outside the box. Taught me how to sell and market myself as a business not just as a person. This experience is more like an opportunity in life. I feel this program has ~~to~~ opened my eyes. The facilitator does his job ~~on~~ how in order to keep us motivated and on point. I used to be a smart thing now I'm smart intelligent individual ready to work in society. I tried life my way now it's time for the strive way. My way of living has changed I was living by the day now I live by the minute. With my emotions in my pocket and Head UP.
