"Essay" 3-week STRIVE Experience

My three week experience at the STRIVE workshop was excellent. I learned a lot during my three week course such as; filling out an application properly. I also learned that my speech wasn't as proper as I thought it was before I came here. I became less shy and more talkative like paying attention and participating each and every single day. The mock interviewing was great. I haven't been on a real interview in a long time and when I did go to one I bombed it thinking I did ok. So at the M.O.C.K interview I was somewhat prepared because of the commercial I rehearsed over and over on paper and in my mind. I learned a lot about myself and my qualities such as my hard skills and my soft skills. STRIVE made me a better individual personally and professionally. I didn't know my skills and capabilities until I came here. I was also forced to dress ⁵⁰properly, nice shirt, dress pants, and a tie to be worn everyday to be a part of STRIVE. I became comfortable wearing these kinds of clothes and enjoy it ⁵⁰very much. Also I became close with some of the people that also attended this workshop and learned new personalities. I did a resume on one of the computers here and read it over and would of hired myself, that's how good it sounds and I want to Thank STRIVE for what this place made me become in just a 3 week period of time.
