

My experience at Strive was amazing. I never would have thought that I was doing my whole job search wrong. I was shown like a parent shows a child right from wrong. See with me I needed the physical help to see where my mistakes were. My class was amazing as well. I grew close to my Strive family because we all worked hard and helped each other go for the best. The whole three weeks taught me so much more than I thought possible to learn in a month. My teacher Ms. T was an absolute gift from GOD. She surprised me because I don't believe til I see it and she did help just as she ~~said~~ said she would on day one. Now I also have come to respect the goals the Strive faculty sets. I am blown away by tips and tools that I'm leaving with. I'm also sad I'm leaving. Can't really picture being somewhere else. For the first time I felt a part of something good and healthy for the mind. With the experience I have had I doubt highly I could forget anyone. Raven at the desk smiling as I walk in in the morning.

Andy is just friendly and when he goes class he always lightened the mood. Tasha has the hard job I think so she has my utmost respect for putting me where my skills fit. Ms. T helped me realize the goals I needed to set before I accomplished my end goal. My classmates or let me say my friends ^{any} ~~with~~ I will never forget the things we learned and experienced. That's my experience at Strive. THANK YOU.
