

What Strive means to me!!

What has Strive meant to me? Good question. Strive has saved my professional life, my life. I have learned so much about how to fill out an application, to speak in the work place to act in the work place. I have learned how to treat my fellow co-workers and my employers. I have learned about me, and I have met some great people, that I hope will stay in my life. And some great educators that really care about my future like they were me. In my experience it is rare to have people care so much about people they really don't know. I have learned about my class mates, life struggles and their ~~trials~~ triumphs. We are a collection of people, who want to succeed, but didn't know where to start, that's when the Strive team stepped in. They taught us how to treat one another as people first, then as co-workers most of all as friends. I will not forget one person in this building, I will not forget one face. They are a part of me as I hope I'm a part of them. When I first started I thought how and will this help me? But when I open my mind and closed my mouth, the world let me in. I have learned more in 3 weeks about the job market, then I have learned in my whole adult life. And what's so different than other agencies is that they keep in contact long after you have completed the class, no other agency even cares enough to call after a week, so in closing Strive is the reason I smile in the morning and some might ask why your smiling and you haven't started yet, I say I don't have a job yet, but I have the right tools to have a career!!
