Strive was helped me in a lot of ways when I first started of strive I had a very low self-esteem and I wouldn't speak up. They have taught me to get out of my little bubble and not be as shy. The people at strive have helped me with learning how to communicate with other people. I have improved with my grammar and verbal skills because of strive I have been taught not to put myself down and to always keep trying. They have helped me with knowing how to properly prepare myself for job interviews. They helped me with filling out applications and how to answer questions. Strive has helped me to deal with my past and how the future is what really matters. We learned about our work fields. Strive taught us how

appearance matters and how important being on time really is. During the weeks at Strive, we had some guest speakers that really caught my attention. During Strive, we had practice interviews that helped me a lot. I thought that I was going to do bad but I was really surprised at myself, I did OK but I still need to work on so it could be perfect. Strive was a good experience that I won't ever forget through out these past weeks I have met wonderful people like Ms T she is just a great teacher and person. I love going to class these last three weeks I am going to miss that, and can't forget the class mate they are wonderful.
